

NOSIDIAN-10

10g/kg nosiheptide

NosiDian 10 is highly effective against a wide range of gram positive bacteria and a select range of gram negative bacteria. NosiDian 10 is highly effective in controlling necrotic enteritis caused by *Clostridium perfringens*. NosiDian 10 consistently and reliably increased rate of weight gain and improves the efficiency of feed utilization.

Mode of Action

NosiDian 10 contains nosiheptide, a thiopeptide antibiotic that inhibits the protein synthesis of target bacteria. NosiDian 10 is non-toxic, is not absorbed by the GIT and has limited cross resistance with other antibiotics.

Indications

Poultry

For the control of necrotic enteritis (caused by *Clostridium perfringens* Types A & C) and as an aid in the prevention of necrotic enteritis in broilers and replacement layers.

Usage

Poultry Prevention :

Prestarter/Starter - 200-250 gms/ton
of finished feed

Grower/Finisher/Prelayer - 200 gms/ton
of finished feed

Withdrawal Period

7 days

Packaging

25 kg Bag
