

NUTRIBMD 100

Indication

- ✓ Increased ADG and feed efficiency.
- ✓ Grow-finish: control of swine dysentery.
- ✓ Sows: control of clostridial enteritis in suckling piglets.

100g/kg
Bacitracin
Methylene
Disalicylate

BMD 100 is a purely fermentation-derived product with no residues, high antibacterial activity, used for improving the rate of weight gain and increasing feed efficiency.

Helps prevention and control of necrotic enteritis, increased rate of weight gain and improved feed efficiency in poultry.

By controlling necrotic enteritis, BMD 100 preserves the integrity of the gut wall, helping to ensure absorption of nutrients from feed BMD 100 is not absorbed from the intestinal tract, thus no withdrawal period needed.

Free-flowing, dust-free granules to Improve flowability and stability that ensures proper dosage.

BMD 100 reduces subclinical and clinical disease, resulting in greater productivity and decreased morbidity/mortality.

Consistent performance after many years of use of this molecule is not included in the FDA/CVM list of medically important antibiotics for human health.

Dosage and Administration:

BMD 100 is recommended at 250 to 500 grams per ton of finished feed in all stages in chickens as a sole ration.

PRESENTATION : 25 KG
