

EnRex[™]

Enramycin 8% Granules

Composition :

Each 1 kg of EnRex contains 80 gm of Enramycin HCl a polypeptide, which has a strong action against Gram positive bacteria (Clostridium perfringens). It improves weight gain and feed conversion

BENEFITS

- ✓ Improves flock intestinal health, resulting in better feed efficiency
- ✓ Improves growth performance at very low inclusion levels
- ✓ Improves weight gain and feed conversion
- ✓ Reduces wet droppings in poultry
- ✓ No cross resistance between Enramycin HCl and other available antibiotics
- ✓ No detectable residues in tissues
- ✓ No side effect

USAGES

- Poultry : 63 to 125 grams per ton of feed (5-10 ppm)
- Pigs : 63 to 250 grams per ton of feed (5-20 ppm)
- For even dispersion in the feed, mix the required amount of EnRex in small quantity of feed before mixing in the final feed.

STORAGE

Store in cool dry place at room temperature
