

# **nutritox** MITB

## Ultimate Toxin Binder with Mold Inhibitor

- Nutritox-MITB is the perfect blend of **Organic acids, HSCAS, Activated Carbon** with high degree of toxin Binding Capacity, **Phytobiotics, Live yeast & specially modified clay** for better Toxin Binding & Mold Inhibition with improved efficiency
- Nutritox-MITB incorporates the synergy of Mold Inhibition & Toxin Binding for better Mycotoxin prevention & Management in the poultry feed

Nutritox provides optimal elimination for full range of Mycotoxins including **Aflatoxins, Ochratoxins, Zearalenone, T2 Toxin, HT2, NIV, DON, DAS, Fumonism & Alkaloids** etc. Specially derived herbal extract helps to maintain keeping quality of feed & prevents fungal attack on the ready feed while storage.

### ■ Benefits

- Nutritox MITB contains Live yeast which on disintegration liberates MOS and  $\beta$  glucans Which potentiates action of toxin binder and helps to boost immunity
- Activated Carbon - Activated carbon has high degree of porosity which greatly increases its surface area & the adsorption capacity  
Surface area of 1 gm material  
Specialized clays           260 m<sup>2</sup>  
Activated Carbon           3000 m<sup>2</sup>
- Nutritox MITB does not allow Fungus to grow in feed, hence improves shelf life of finished feed
- Nutritox MITB provides optimal elimination of full range of Mycotoxins & helps to improve Gut Health & Immunity
- Nutritox MITB does not adsorb vital Nutrients and Vitamins from feed
- Nutritox MITB is effective on Bacterial Endotoxins & Chemical toxins
- Nutritox MITB protects Vital organs from the ill effects of Mycotoxins

Presentations : 25 kg

### ■ Dosage

Mycotoxin prevention Programme : 1-1.5 kg/Tonne of feed  
Mycotoxin Treatment Programme : 2 Kg/Tonne of feed  
(When high degree of mould growth & toxicity is suspected)

**Nutritox-MITB**

**Superior Mycotoxin Prevention & Management Solution**
